Forecast for Tuesday 15 Dec 2020

Weather: Mainly dry for daylight hours with some sunshine, although a few showers along western coastal ranges, wintry above 800 metres. Showers becoming more widespread after dark, falling as snow down to 700 metres as it turns colder at height.

Chance of cloud free mountain/hill tops above 800m: Most summits clear in the north of the area, some patchy cloud around 600 metres across the Cuillins and the south of the mainland. Patchy cloud down to 600 metres developing in the evening further north too.

Visibility: Mainly very good during daylight hours. Poor in cloud and snow.

Met Office Aberdeen Meteorologist's View

Notable wind chill at height. Icy surfaces at higher elevations.

Forecast for Wednesday 16 Dec 2020

Weather: Widespread rain, with snow on higher summits, spreading north in the morning. Turning dry by early afternoon but further widespread rain and higher summit snow returns across Skye and the south from late afternoon. North likely to stay mostly dry for the afternoon. Very windy.

Maximum wind: Southerly gusts 50 to 60 mph for most of the day on the tops

Chance of cloud free mountain/hill tops above 800m: Widespread low cloud between 450 and 700 metres in morning rain and snow, this breaking up from the west for a while in the afternoon before returning from late afternoon. Low confidence for detail at this stage.

Visibility: Mainly good outside of low cloud and rain

Temperature: Glens: Plus 2 rising to 8 Celsius
At 800m: Plus 4 Celsius
Freezing level: Above summits
